

Missing Data Analysis

Gentle Introductory Reading List

Compiled by Kyle M. Lang

2019-11-04

The sources listed below offer a gentle introduction to missing data analysis. These readings focus on broad conceptual overviews without much technical detail or mathematical rigor (i.e., very few equations).

These sources are generally oriented toward a social-scientific/psychological audience, so readers from other disciplines may find the examples somewhat less helpful.

Books

- Allison, P. D. (2002). *Missing data*. Thousand Oaks, CA: Sage Publications.
- Enders, C. K. (2010). *Applied missing data analysis*. New York, NY: The Guilford Press.
- Graham, J. W. (2012). *Missing data: Analysis and design*. New York, NY: Springer. doi: 10.1007/978-1-4614-4018-5

Introductions/Reviews

- Baraldi, A. N., & Enders, C. K. (2010). An introduction to modern missing data analyses. *Journal of School Psychology, 48*(1), 5–37.
- Enders, C. K. (2013). Dealing with missing data in developmental research. *Child Development Perspectives, 7*(1), 27–31.
- Graham, J. W. (2009). Missing data analysis: Making it work in the real world. *Annual review of psychology, 60*, 549–576.
- Lang, K. M., & Little, T. D. (2018). Principled missing data treatments. *Prevention Science, 19*(3), 284–294.
- Little, T. D., Jorgensen, T. D., Lang, K. M., & Moore, E. W. G. (2013). On the joys of missing data. *Journal of Pediatric Psychology, 1*–12. doi: 10.1093/jpepsy/jsto48
- Schafer, J. L., & Graham, J. W. (2002). Missing data: Our view of state of the art. *Psychological Methods, 7*(2), 147–177. doi: 10.1037//1082-989X.7.2.147

MI-Focused

Rubin, D. B. (1996). Multiple imputation after 18+ years. *Journal of the American Statistical Association*, 91(434), 473–489.

ML-Focused

Enders, C. K. (2001a). The performance of the full information maximum likelihood estimator in multiple regression models with missing data. *Educational and Psychological Measurement*, 61(5), 713–740.

Enders, C. K. (2001b). A primer on maximum likelihood algorithms available for use with missing data. *Structural Equation Modeling*, 8(1), 128–141.

Enders, C. K., & Bandalos, D. L. (2001). The relative performance of full information maximum likelihood estimation for missing data in structural equation models. *Structural Equation Modeling*, 8(3), 430–457.
